LIVE LONG AND PROSPER

A highly motivational multi-media assembly presentation for grades 7-12

THE MESSAGE:

As fascinating as some of the extra-terrestrials portrayed in science fiction may be, the truth is, we humans are still the most amazing living beings known to exist. We have a unique desire to explore. We want to...

"boldly go where no one has gone before. . ."

We actually do have a lot of control over whether we **LIVE LONG**. When it comes to self-destructive things, we can learn all we need to know from those who have gone before. We don't need to go there.

There are, however, some things we do need to explore: We can explore new ways to expand our lives in ways that make the future an exciting adventure.

What does it really mean to **PROSPER**? It means to succeed or become strong and thrive. Yes, we sometimes think it's about getting rich, but we can't fully control that. What we can control is whether we succeed, become strong and thrive in the ways that matter most. We can help, support and even protect those who need our help. We can make everyone a part of the adventure and excitement that our lives are meant to be.

Prominent issues: Bullying, Substance abuse, Driver safety, Internet Safety

THE METHOD

Movie and music clips are woven together with **sports action** and inspiring **students** whose **stories** deliver a high- impact experience.

**Our three screens create
an 11' x 43' video wall!**

Please call 1.888.229.4927 to schedule a voyage.
