# FIX IT!

We think about all of the bad things that happen to us and around us—sometimes even being blinded to the good things—and often feel powerless and fearful.

**VIOLENCE 🗡️\* ADDICTIONS ☠️ BULLYING 😡 FAMILY PROBLEMS 🏠 FAILURE IN SCHOOL**

While there are many problems that can't easily be fixed, there are three realities that can help us overcome our fears as we face these challenges:

Often, we *can* fix it!

We can always try to help fix it!

We will usually make it better by trying to fix it!

Letting fear dominate our thinking only makes things worse.

If we don't let fear paralyze us we can do a lot more than we might think...

*A teenage girl lifts a 7000 pound truck to rescue her dad!*

*A thirteen-year-old rescues seventeen people on an air mattress during Hurricane Harvey!*

*Athletes overcome opioid addictions that began with doctor's prescriptions!*

*Teens mow lawns for free to help those who can't do it themselves!*

*A man reveals his plan to do violence as a teenager, and how his friend's kindness stopped him!*

*A survivor of extreme bullying creates an app that helps kids stay connected and never alone!*

These and other stories are woven together with music and sports action on three giant screens to create a fun and inspirational message of empowerment!
